

Algo Feeds Server

Your Gateway to Real-time Market Data

Discover the power of Algo IQ Feed Server, your indispensable tool for accessing real-time exchange rate information effortlessly. Through a dedicated leased line, the Algo IQ Feed Server efficiently collects and translates data from the NSE into a user-friendly format, empowering a diverse range of trading activities.

Why Algo IQ Feed Server?

- **Get Real-time Data, Real Quick:** It's all about speed. Our feed server quickly translates NSE's binary data into a format that's easy on the eyes and up to the second.
- **Data Delivered Your Way:** We've got all the data fields you need, from LTP to Volume and everything in between. It's a buffet of market intel.
- **Handle Multiple Segments:** Whether you're into Futures and Options, Cash Market, or Currency Derivatives, we've got you covered.
- **User-Friendly Interface:** One click, and you're in. Save your login details and breeze through the login process.
- **Settings Tailored for You:** Customize settings to match your trading style - from broadcast preferences to database connections and settlement options.
